Modern Design and Complete Conference Functioning From The Paoli Overture Collection

ORLEANS, INDIANA, June 2008 – Two market-driven features stand out prominently for the new Overture casegoods collection from Paoli: a mixed-materials aesthetic and technology-driven conferencing components.

Kent Robbins, Paoli Vice President, Marketing, says, “The design details and technology solutions built into Overture appeal to designers and end users, while learning and selling the series is easy for dealers.”

A Modern Wood Aesthetic

Aesthetically, Overture features a modern mix of materials. Rich veneered surfaces in contemporary shapes establish the look with metal details adding a jewel-like quality. Overture tops come in full corner styles and notched corner styles. The notch detail echoes the form of the aluminum base detailing. Notched corner tops include the visual interest of contrasting grain inserts in the center and the borders. Table bases and tops can be specified in different wood finishes for a two-toned look. Available in either cherry or maple, Overture is available in all standard Paoli finishes.

Extensive Conferencing Capabilities Under the Surface

According to Overture’s designer Mark Stenftenagel, the new table series addresses the market need for technology-savvy conference room tables. For this, the design features a large power/data trough transecting the bases under the table top. At up to 12-inches wide, the trough is large enough to hold small video projectors and telecom units, along with a large quantity of wiring. This extensive power and data capability facilitates teleconferencing and intensive laptop training. Easy-access power and data wiring and cables connect up through the table base via removable panels.

In addition, Overture offers Paoli’s largest conference table at 166-inches wide and 54-inches deep.

Comprehensive office and conferencing components and accessories

Overture offers a full model range for offices and conference rooms giving specifiers choices for a variety of applications. Overture table top shapes are: square, video conference V-shape, rectangle, racetrack, round and boat shape. The Overture accessories line includes a hospitality cart, buffet console, lectern, telephone table, buffet credenza, and TV cabinet. There is also a 108-inch media workwall.

Mark Stenftenagel is President of Qdesign, a product design company in Oakbrook, IL. Stenftenagel's goal is to create innovative products and to integrate green design strategies into each of his projects.

Specializing in office and contract furnishings, Paoli has been a manufacturer of fine wood furniture since 1926. An HNI company, Paoli's mission is to create long-term product value while exceeding customer expectations. Key to the success of this mission is business simplification, continuous improvement, process and product innovation, and integrity.
